<b>Office Action Summary</b>	<b>Application No.</b> 10/717,271	<b>Applicant(s)</b> MACRAE ET AL.	
	<b>Examiner</b> OLUGBENGA O. IDOWU	<b>Art Unit</b> 2623	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 28 January 2008.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

### DETAILED ACTION

1. Applicant's election without traverse of group 1 in the reply filed on 1/28/2008 is acknowledged.

#### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 14 -15, 17, 19, 39 - 40, 42, 44, 64-65, 67, 69, 89-90, 92 and 94 rejected under 35 U.S.C. 102(e) as being anticipated by Matthews, publication number: US 2004/0139465 A1.

As per claims 14, 39, 64 and 89, Matthews teach providing users with real- time information using an interactive television program guide application, the method comprising:

displaying at least one program listing having real-time information, wherein the at least one program listing corresponds to a program (EPG, [0047]);

providing the user with an indication that real-time content related to the real-time information is available, wherein the indication is selectable (hyperlinks, [0069], lines 1 –

Art Unit: 2623

2, 5 - 9) and wherein the real-time content is not the program that corresponds to the at least one program listing (hyperlink accessing information from the web, [0072]); and in response to selecting the indication, displaying the real-time content (browser being lunched based on hyperlink access, [0072]).

As per claims 15, 40, 65 and 90, Matthew teaches wherein the indication is a video clip (hyperlink being a link to a video, [0069], lines 9 - 14).

As per claims 17, 42, 67 and 92, Matthews teach wherein the indication is an alert (hyperlink 140, [0069], lines 1-2)

As per claims 19, 44, 69 and 94, Matthews teach wherein the displaying the real-time content further comprises providing the user with a program that is currently being broadcast, and wherein the program that is currently being broadcast is discussing the real-time information (hyperlink for the Seinfeld show pointing to video coverage of Jerry Seinfeld, [0069], lines, lines 9 - 14)

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 16, 41, 66 and 91 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matthews, publication number: US 2004/0139465 A1 in view of Schlarb, publication number: US 2004/0078823 A1.

As per claims 16, 41, 66 and 91, Matthews teaches a system that indicates the availability of data to a user and allows the user to access the data.

Matthews does not teach a system that uses an icon.

In an analogous art, Schlarb teaches a system that uses an icon as an indication (PPV icon 302, [0018])

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify Matthews' supplemental information system by including an icon instead of a whole URL, as described in Schlarb's program identification system for the advantages of reducing clutter in the EPG and allowing user to easily comprehend what is being displayed.

6. Claims 18, 43, 68 and 93 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matthews, publication number: US 2004/0139465 A1 in view of Dunn, patent number: US 6 668 377B1.

As per claim 18, 43, 68 and 93 Matthews teaches indicating the availability of data to a user and allows the user to access the data.

Matthews does not teach a system whereby the user can remove an indication.

In an analogous art, Dunn teaches a system whereby the user can remove an indication (removing an item from a list, col. 10, lines 21 – 26)

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify Matthews' supplemental information system by allowing a user to remove unnecessary indicators, as described in Dunn's preview system, for the advantages on reducing clutter and unnecessary indicators in the program guide.
